Date of Publication: January 28, 2021

Key Characteristics of the Change:

Transport Media, Product Material

Forecasted Key Milestones:

Date Customer Must be Ready to Receive Post-Conversion Material:	February 28, 2021
---	-------------------

Description of Change to the Customer:

Intel Corporation is changing the Retail Packaging Kit for select Comet Lake i9-10900K CPUs for Universal and China Box SKUs. This change decreases the volumetric storage requirements of the product, by increasing the current consumer units per pallets from 480 to 1,620.

Details of Change:

- Existing custom packaging kit will be replaced with an Intel standard folding carton
- Existing disti box will be replaced with desktop K sku disti box
- Existing labels and format will be replaced with Intel standard folding carton label placement and format

Current Retail Package

New Retail Package

Customer Impact of Change and Recommended Action:

This packaging change will affect the appearance of the shipping container for distributors and the internal packaging components. This change may result in decrease costs for shipping box configuration. This change results in material procurement simplicity and standardized palletization usage. There is no change to the form, fit or function of the label or product contained therein, therefore no action is needed by customers. Customers may see a mix of products until inventory has been depleted. Customers may also receive post-conversion material before the above target date if the current inventory is depleted sooner.
