Product Change Notification

Change Notification #: 108373 - 00
Change Title: All Intel® Component Desiccant Packed Products, PCN 108373-00, Transport Media, Change to HIC (Humidity Indicator Card) Levels
Date of Publication: April 01, 2008

Key Characteristics of the Change:

Transport Media

Forecasted Key Milestones:

Date Customer Must be Ready to Receive Post-Conversion Material:	May 01, 2008
Date of First Availability of Post-Conversion Material:	May 01, 2008

The date of "First Availability of Post-Conversion Material" is the projected date that a customer may expect to receive the Post-Conversion Materials. This date is determined by the projected depletion of inventory at the time of the PCN publication. The depletion of inventory may be impacted by fluctuating supply and demand, therefore, although customers should be prepared to receive the Post-Converted Materials on this date, Intel will continue to ship and customers may continue to receive the pre-converted materials until the inventory has been depleted.

Description of Change to the Customer:

The change is on the HIC (Humidity Indicator Card) ink spot from 5,10,15%RH to 5,10,60%RH to comply with the new JEDEC standard requirement.

The HIC is a card on which a moisture-sensitive chemical is printed such that it will change color from blue to pink when the indicated relative humidity is exceeded. This is packed inside the moisture-sensitive bag, along with the desiccant, to aid in determining the level of moisture to which the moisture-sensitive devices have been subjected.

Current HIC:

New HIC:

Customer Impact of Change and Recommended Action:

No customer impact is anticipated.
