# Product Change Notification

**Change Notification #:** 111251 - 00  
**Change Title:** Intel(R) Server System  
SR2600URBRPR,SR2625URBRPR,  
SR2625URLXT, PCN 111251-00, Product  
Design, Update Power Supplies and Power  
Distribution Module to support Cold  
Redundancy  
**Date of Publication:** December 23, 2011

## Key Characteristics of the Change:

Product Design

## Forecasted Key Milestones:

<b>Date Customer Must be Ready to Receive Post-Conversion Material:</b>	Jan 27, 2012
---	--------------

## Description of Change to the Customer:

Intel is updating the Power Supply and Power Distribution Module of the Intel(R) Server Systems SR2600UR and SR2625UR to support "Intel(R) On Demand Redundant Power Technology" (Cold Redundant Power Supplies). Cold Redundancy reduces system idle input power by putting the redundant supply into a standby condition rather than load sharing between the two supplies.

The Cold Redundant Power Supply and Power Distribution Module are both fully compatible with the previous version of Power Supply and Power Distribution Board. However, to gain support for Cold Redundancy, only the new Power Supplies and Power Distribution Modules can be used. The system will not be able to enter into Cold Redundant mode if there is any previous version of Power Supply or Power Distribution Module installed in the system.

## Customer Impact of Change and Recommended Action:

Intel anticipates no impact to customers.
