## Description of Change to the Customer:

### Reason for Revision: Modify text in label combination to include FCC.

The Intel® Ethernet Converged Network Adapter X540-T1 and X540-T2 Retail and OEM Generic, Product Codes: X540T1, MM# 914246, X540T1BLK, MM# 927235, X540T1G1P5, MM# 914242, X540T2, MM# 914248, X540T2BLK, MM# 927245, X540T2G1P5, MM# 914244 will undergo the following updates:

#### 1. Australia Regulatory Mark Change

- The Australian Communications and Media Authority's (ACMA) labeling arrangements to reflect regulatory compliance changed on 1 March 2013, to be phased in over a three-year transition period. Products shipping March 1, 2016 need to be labeled with the "RCM" mark.
- Per ACMA requirements, Intel will be changing the C-Tick regulatory mark on all products to the "RCM" mark.
- Mark will be updated in two ways, depending on how the current C-Tick mark is already on products:
  - If C-Tick mark is currently on PCB silkscreen, Intel will apply a label with RCM mark to cover current mark.
  - If C-Tick mark is currently printed on a label, Intel will replace the mark so labels will be printed with new mark.

- See for picture of "C-Tick" versus "RCM" mark

2. Where applicable this will affect OEMG and Retail NICs.

Combining of KCC and/or the FCC and/or Date of Manufacture label with the product ID label to minimize labels on the board.

In addition we'll be taking the opportunity to:

- Remove reg label KCC\_DOM or FCC
- Edit PID label Product ID
- To Include PID label Product ID + DOM or Product ID + DOM + other

The WEEE label  may be incorporated into the Intel branded PID.

Example of PID Label with FCC and WEEE.

### Customer Impact of Change and Recommended Action:

Customers can expect to receive mixed inventory until current inventory levels are depleted. Intel anticipates no functional impact to customer but encourages customer to understand the changes. Please contact your local Intel Field Sales Rep if you have any further questions about these changes.
