# Product Change Notification

**Change Notification #:** 110265 - 00  
**Change Title:** Boxed Intel® Core™ i5-660 Processor,  
PCN 110265-00, Product Design, C2 to K0  
Stepping Conversion  
**Date of Publication:** October 07, 2010

## Key Characteristics of the Change:

Product Design

## Forecasted Key Milestones:

<b>Date Customer Must be Ready to Receive Post-Conversion Material:</b>	Oct 18, 2010
<b>Date of First Availability of Post-Conversion Material:</b>	Oct 18, 2010

*The date of "First Availability of Post-Conversion Material" is the projected date that a customer may expect to receive the Post-Conversion Materials. This date is determined by the projected depletion of inventory at the time of the PCN publication. The depletion of inventory may be impacted by fluctuating supply and demand, therefore, although customers should be prepared to receive the Post-Converted Materials on this date, Intel will continue to ship and customers may continue to receive the pre-converted materials until the inventory has been depleted.*

## Description of Change to the Customer:

Intel is initiating a C-2 to K-0 stepping conversion for the Boxed Intel® Core™ i5-660 Processor where it will undergo the following changes:

- . New S-spec and MM number for the converting product
- . Extended CPUID will change from 0x00020652 to 0x00020655
- . Host RevID will change from 0x12 to 0x18
- . K0 stepping package is pin compatible with C2 stepping package
- . Adds Processor Context ID (PCID) support

## Customer Impact of Change and Recommended Action:

Intel anticipates no change to customer platforms designed to Intel guidelines. Minimal re-qualification and/or validation are expected for features already supported on the C2 stepping. Boxed Intel® Core™ i5-660 Processor on K0 stepping will require a BIOS update. With the BIOS update implemented both C2 and K0 stepping processors will be supported. For customers implementing their own BIOS, it is necessary to incorporate the latest Microcode Update (MCU) to support the K-0 stepping. Please contact your local Intel representative for further technical questions. Customer should update to the latest Intel Integrated Graphics drivers for K-0 step processors.

Customers who want to continue using the Intel® Stable Image Platform Program (Intel® SIPP) drivers with K-0 step processors should confirm BIOS support for Compatibility Rev ID (CRID). Customers should be ready to receive a combination of C2 stepping material and K0 stepping material by the "Date Customer Must be Ready to Receive Post-Conversion Material" as shown in the milestones above.

**Products Affected / Intel Ordering Codes:**

<b>Boxed Intel® Core™ i5-660 Processor</b>									
<b>Processor #</b>	<b>GHz</b>	<b>Pre Conversion Material</b>				<b>Post Conversion Material</b>
