Description of Change to the Customer:

The Intel® 10 Gigabit AF DA Dual Port Server Adapter, Intel® Gigabit EF Dual Port Server Adapter, Intel®10 Gigabit CX4 Dual Port Server Adapter, Intel® PRO/1000 PF Quad Port Server Adapter SKUs listed in the product table below will undergo the following changes:

1. ROHS Flyer

Add or update the China "EU" RoHS flyer to over-pack box. Includes the Intel contact info, per Intel to meet an EU ROHS recast, and now officially called ROHS 2 that goes into effect as of 1/1/2013. In this recast, there is a requirement to include the single point of contact address label for items requiring the "CE" mark.

G70604-002

As part of Intel's efforts to be environmentally responsible,
a CD is no longer included in the box with this adapter.

2. CDA Removal (SKUs: EXPX9502CX4,E10G42AFDA,E1G42EF and E1G42EFBLK)

As part of Intel's efforts in environmental responsibility, Intel will no longer include a software CD in the box with the Retail version of Intel® 10 Gigabit AT2 Server Adapter and Intel® Ethernet Converged Network Adapter.

Because of the rapid pace of technology, the software on the CD is usually out of date before the adapter is sold. Drivers that enable basic functionality are included with most operating systems and the latest software, drivers, and documentation are available for download. See ROHS flyer described above.

3. Distribution Label Change

Intel Corp is standardizing packaging label formats across the corporation. This will facilitate easier receiving for the end customer.

Intel will begin implementation of UPC and EAN (European Article Number) codes on the product outer case labels.

The online product catalog (ARK) will be updated with the new UPC & EAN info.

A new line of text will be added that states either:

- Product is individually labeled for resale.
- Product is not individually labeled for resale.

Additional fields are being added to display the outer case UPC and EAN codes for overall carton quantity. New UPC codes for individual boxes are also being added.

2D matrix label will be added for easier product information scanning.

Customers should be aware that UPC and EAN codes on the outer case carton labels will be changed and that they may need to update their incoming receiving operations. Customers may receive both current and new inventory as the implementation occurs.

4. Product Label Change

Intel is removing the UPC code on the PBA Product ID label, and using the extra space to incorporate the WEEE and/or eFUP logos onto the Product ID label. The Product ID label is currently placed on either the front or back of the Printed board (PB).

Due to the standardization of UPC codes on the shipping label, the UPC code on the board Product ID label is no longer required, and it will be removed. If applicable, the WEEE and/or EFUP markings (WEEE= Waste Electrical and Electronic Equipment (Directive) and EFUP = Environment Friendly Use Period (China RoHS directive) (currently on separate, individual labels attached to the printed board) will be incorporated on the Product ID label.

Current label example:

New label example:

5. As a result of this change the TA (Top Assembly) and PBA (Printed Board Assembly) numbers will roll as listed in the affected product table below.

Customer Impact of Change and Recommended Action:

Intel anticipates no impact to customers.

Please contact your local Intel Field Sales Rep if you have any further questions about these changes.

Customers should expect to receive mixed inventory until current inventory levels have been depleted.
