PCN 113882-01, Transport Media,  
Shipping Tray Change  
**Reason for Revision: Including Shipping Tray  
Part Numbers and Pictures**  
**Date of Publication:** August 06, 2015

## Key Characteristics of the Change:

## Forecasted Key Milestone:

<b>Date Customer Must be Ready to Receive Post-Conversion Material:</b>	August 24, 2015
---	-----------------

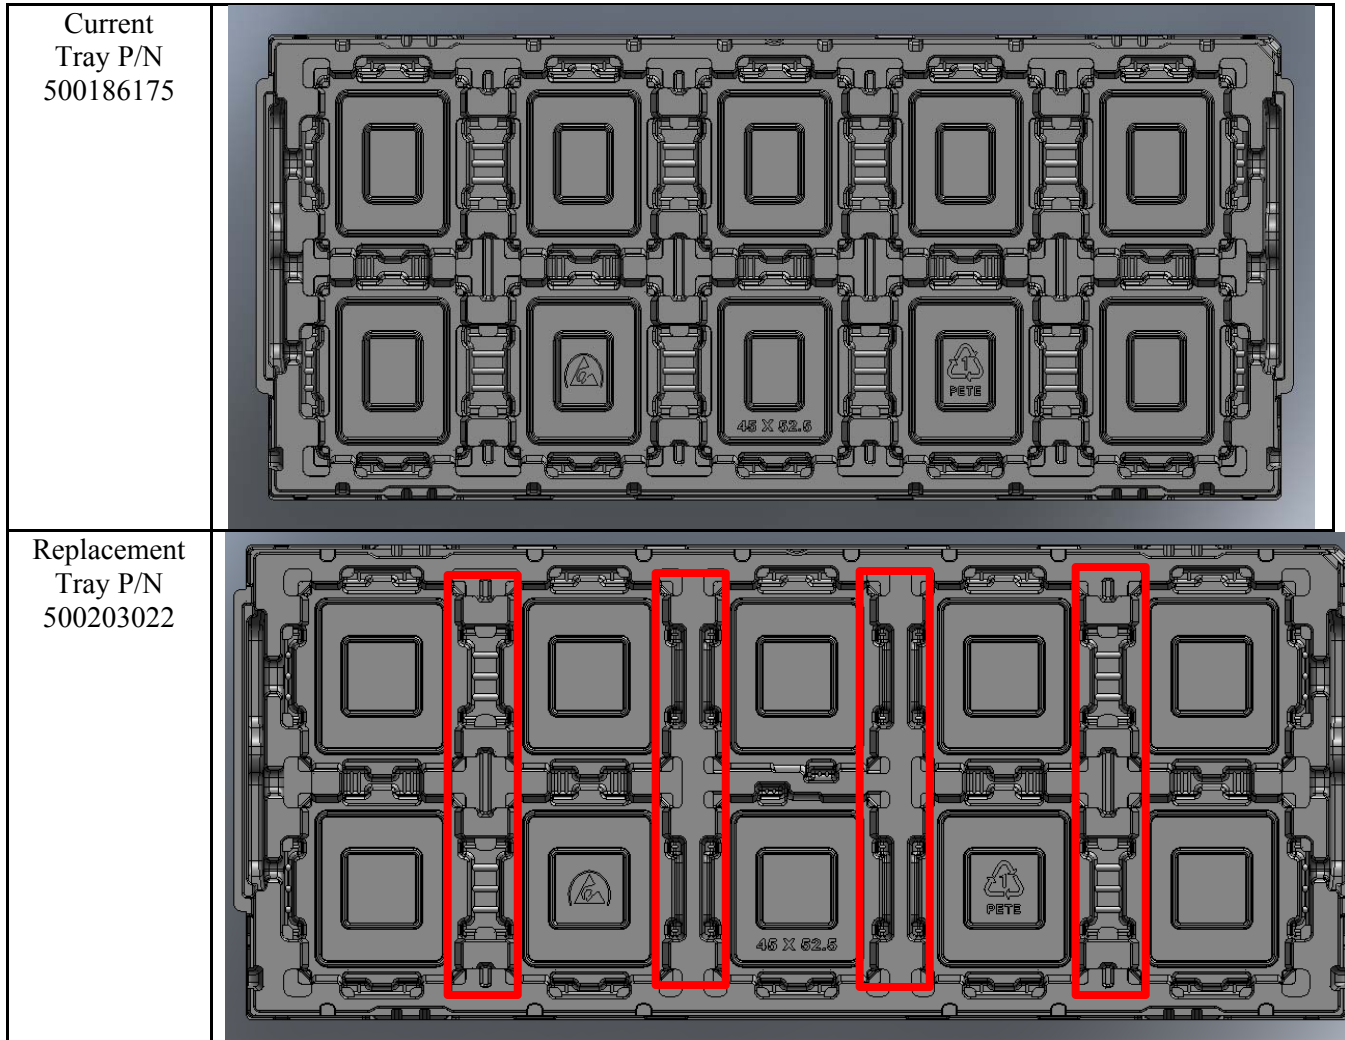

## Description of Change to the Customer:

### Reason for Revision: Including Shipping Tray Part Numbers and Pictures

The standardization of these trays are part of Intel's process improvement efforts to avoid mixing trays which could cause potential excursions at customers' sites.

Tray standardization does not impact the cover tray, or the tool run rate since the configuration and density remains the same. Safety and Ergo in tray handling remain unchanged.

There are no changes to the overall length, width, or height. No change in the pitch or offsets for the pockets. There is no impact to any equipment including handling or recipes. The trays are identical except for some internal features which allow room for the various Internal Heat Sink designs.

**Customer Impact of Change and Recommended Action:**

Intel strives to ensure an uninterrupted supply for our customers and for this reason, customers may receive a mixture of both trays until inventory is depleted.

**Note:**

During the transition period, customers could see more than one partial box per shipment since the old tray and the updated tray box cannot be combined into one box.
