Product Change Notification

Change Notification #:	110779 - 00
Change Title:	Intel PRO/1000 PF Dual Port Adapters (Bretona OEM generic/Retail), PRO/1000 PT Server Adapters (Glyndon OEM generic/Retail), PRO/1000 PT Dual Port Adapters (Redwater OEM generic/Retail), and PRO/1000 PF Server Adapters (Sheepshead Bay OEM generic/Retail), PCN 110779-00 Label Updating KCC (Korean Communications Commission) logo to the new KC logo on PB (printed board) and all box labels
Date of Publication:	June 28, 2011

Key Characteristics of the Change:

Label

Forecasted Key Milestones:

Date Customer Must be Ready to Receive Post-Conversion Material:	July 15, 2011
---	---------------

Description of Change to the Customer:

The Intel PRO/1000 PF Dual Port Adapters (Bretona OEM generic/Retail), PRO/1000 PT Server Adapters (Glyndon OEM generic/Retail), PRO/1000 PT Dual Port Adapters (Redwater OEM generic/Retail), and PRO/1000 PF Server Adapters (Sheepshead Bay OEM generic/Retail), will undergo the following changes:

To comply with new regulations from Korea, Intel will be adding the new KC logo to the Printed Board (PB) as a label. The label will be added to either the front or the back of the PB depending on space constraints. The new KC logo will also be added to all box labels (product box label and over-pak box label). **(see pictures 1, 3 & 4)**

The old silk screened KCC logo will remain on the PB (either front or back). We cannot cover this logo up with the new KC label, as it would interfere with other markings. **(see picture #2)**

As a result of these changes, the TA (top assembly) number and PBA (printed board assembly number) will roll as noted in the affected products table within this PCN notice. If TA/PBA numbers are printed on any product or box labels, those will show the dash roll as well.

Picture 1 showing old KCC logo and new KC logo.

Picture 2 showing the old KCC logo, which will remain on the PB.
(picture 2 example only)

Picture 3 showing the new KC label, which will be placed on the PB as a label. The KC label will contain; Date of Manufacture, Made in Country of Origin (COO) and a unique Product Identification number.
(picture 3 example only)

Date of Manufacture, Made in COO, Product Identification number

Picture 4 showing new KC logo on box label. The box label already contains the Made in Country of Origin (COO) and the Date of Manufacture, this information will also show on the KC label.

New KC logo, Date of Manufacture, Product Identification number, Made in COO (Picture 4, all of the information showing in Picture 4 is for example only and may not reflect actual data)

Customer Impact of Change and Recommended Action:

Please contact your local Intel Field Sales Representative if you have any further questions about these changes.

Customers can expect to receive mixed inventory, until current inventory levels are depleted.

The addition of the new KC logo to the PB and box labels will not affect the Form, Fit or Function of the affected product(s).

Please Note: *Due to the complexity of these changes to all of our shipping Networking Adapter products and current inventory levels, we are implementing the above changes with a phased in approach.*

First Phase:

Between the date of PCN publication and July 15th, 2011, customers can expect to receive the new KC logo only showing on the box labels and not on the PB (printed board). During this time period, customers can expect to see the KC logo placed on box label as either a pre-printed logo (see Picture #4) or a white label placed onto the pre-printed label (see Picture #5). During the first phase, the TA and PBA numbers **will not roll** as noted within the affected products table within this PCN notice.

Second Phase:

Between July 15, 2011 and November 1, 2011 customers can expect to receive mixed inventory of either First Phase product and/or the product as described within this PCN notice. During the second phase, customers can expect to receive product marked with either OLD or NEW TA and PBA numbers.

Picture 5, showing white KC label placed onto box label.

(Picture #5 example only, all of the information showing in this picture may not reflect true data)
