PCN 115385-00, Product Design, SSD,  
Driver, and Node Updates

**Date of Publication:** April 4, 2017

## Key Characteristics of the Change:

Product Design

## Forecasted Key Milestones:

<b>Date Customer Must be Ready to Receive Post-Conversion Material: *</b>	Apr 30, 2017
---	--------------

\* Intel appreciates the customer's desire to receive the latest revision of products. However, Intel manages inventory on a first in first out (FIFO) basis at the MM# level. Subsequently, customer requests for a specific revision of material (below the MM#) will not be supported by Intel.

## Description of Change to the Customer:

Intel is implementing the following changes:

1. The vSAN Ready Node All Flash configurations (VRN2208WAF6, VRN2208WAF8) will now incorporate the Intel SSD DC S3520 drive, replacing the Intel SSD DC S3510 which has been discontinued (discontinuance in PCN114906-00).
2. The vSAN Ready Node All Flash driver package has been updated from G2010150 to N2010018.
3. All vSAN Ready Node SKUs are updated from Intel Remote Management Module 4 Lite 1 to Intel Remote Management Module 4 Lite 2.
4. Micron will be the new memory vendor replacing Samsung for all SKUs listed in the Product Affected / Intel Ordering Codes table.

## Customer Impact of Change and Recommended Action:

Intel does not expect any impact to customers from these changes, but encourages customers to understand the change and determine the impact on their applications. For that reason, Intel recommends that the customers perform a standard level of evaluation.
