Forecasted Key Milestones:

Date Customer Must be Ready to Receive Post-Conversion Material:	April 15, 2019
-------------------------------------------------------------------------	----------------

Description of Change to the Customer:

To ensure that the Intel product you purchase meets the stringent quality and reliability standards that you have come to expect, Intel is implementing an authentication label for our Ethernet Optic Kit products.

The Intel® Ethernet Optic Kit products mentioned in the *Products Affected / Intel Ordering Codes* table below will undergo the following changes:

This label will provide you with on-demand validation and manufacturing information about your product. When you receive product with this new authentication label, you will be able to verify that you have a genuine Intel product by scanning the QR code, which will link to: <https://verifyintel.bradyid.com/>.

This authentication label will be placed on the secondary side of the Optic module, see sample below.

(example only)

Additionally on the Intel® Ethernet SFP+ SR Optics skus (E10GSFPSR, E10GSFPSRG1P5, E10GSFPLR), the product ID label will be re-located to the side of the optic on a horizontal label:

As a result of this change, the TA (top assembly) numbers will roll as noted in the affected products table within this PCN notice. If the TA numbers are printed on any product or box labels, those will show the TA dash roll as well.

Customer Impact of Change and Recommended Action:

Customers can expect to receive mixed inventory until current inventory levels are depleted.

The label change to the products does not affect the operation or functionality of the product.

Customers should be aware of the changes to the label and take appropriate actions to accommodate the changes and avoid impact to their processes for receiving or integration in their factories.

Please contact your local Intel Field Sales Rep if you have any further questions about these changes
