Change Notification #: 117363 - 00
Change Title: Select Intel® Optane™ SSD DC D4800X Series Products, PCN 117363-00, Product Design, Firmware Update
Date of Publication: December 18, 2019

Key Characteristics of the Change:

Product Design

Forecasted Key Milestones:

Date Customer Must be Ready to Receive Post-Conversion Material:	January 17, 2020
---	------------------

Description of Change to the Customer:

The Intel® Optane™ SSD DC D4800X Series SKUs listed in the Products Affected table below will have the firmware version updated from E2010467 to E2010470. The changes in the new firmware version are incremental improvements from previous version. Inventory will transition in the Intel factory on or beyond the above date to replace older firmware version with the latest version.

Customer Impact of Change and Recommended Action:

Since the firmware update has incremental improvement over the previous version, Intel anticipates no product impact with this firmware, and re-qualification is not recommended.

Intel will attempt to deplete pre-conversion material before shipping post-conversion material but there is a possibility of Intel shipping mixed inventory. Therefore, customers will need to manage and migrate to the post-conversion material as soon as possible.

Milestone dates are estimates and subject to change based on business and operational conditions.

Please contact your local Intel Field Sales Rep if you have any further questions about these changes.
