Date of Publication:	October 15, 2012

Key Characteristics of the Change:
Product Design
Label
Transport Media

Forecasted Key Milestones:

Date Customer Must be Ready to Receive Post-Conversion Material:	Oct 31, 2012
---	--------------

Description of Change to the Customer:

Intel will be disabling Wake DMA Dynamic Clock Gating in the EEPROM in order to address an issue of dropping multicast packets. This will be accomplished by modifying EEPROM; word 0xF, setting bit 1 to '1b'.

For KCC (Korean Communications Commission): A clerical error on the compliance worksheet caused KCC cert number to be inaccurately transposed during KCC marking update. The board is currently marked "CPU-E98162 (B)". The correct number shown on the certificate is "CPU-E98152 (B)". To be in compliance with the Korean regulations we need to correct the marking so that it is the same as what is shown on the certificate.

The CDA (SW lit kit CD) will be removed from the products and updated version of the flyer will be added.

As part of Intel's efforts to be environmentally responsible,
a CD is no longer included in the box with this adapter.
