Description of Change to the Customer:

The Intel® NUC Kit SKUs listed in the products affected table below will have the following changes.

1. The Intel NUC Kit digital microphone (DMICS) array circuit has been improved. The DMICS consists of dual front facing digital microphones located on the front panel of the NUC kit.
2. The HDMI Firmware will be updated from version 1.63 to version 1.66 to enhance operation.

Customer Impact of Change and Recommended Action:

These changes have been evaluated to ensure that there are no quality, reliability or functional implications to our customers. Intel is not recommending additional qualification of these changes on platforms received from Intel.

Milestone dates are estimates and subject to change based on business and operational conditions.

Customer can expect to receive mixed inventory until current inventory levels are depleted.

Please contact your local Intel Field Sales Rep if you have any further questions about these changes.
