Description of Change to the Customer:

Reason of revision: [European Union Regulatory Product Shipping Restrictions update, Last Product Discontinuance Shipment Date update, and added MM#944468 to the affected product list](#)

Note: This notification and dates applies to EU member countries only. This product change notification does not apply to countries outside of the European Union.

Beginning on March 1, 2020, an additional component of the European Union (EU) regulatory CE marking scheme, identified as EU Directive 2019/424 (Lot 9), will go into effect. After this date, all new server systems must meet all the additional EU Lot 9 regulatory requirements in order to ship into or deploy server systems within the EU.

Intel has determined that none of the products identified in the "Products Affected/Intel Ordering Codes" table below, can meet these requirements. Therefore, Intel is announcing that it will no longer ship the listed Intel products to any country within the EU.

This notification and dates applies to EMEA only.

Intel is announcing the discontinuance of the Intel® Server Spare kit listed in the "Products Affected/Intel Ordering Codes" table below.

Intel will make best efforts to support all orders placed between the Non-Cancelable and Non-Returnable (NCNR) and the Last Product Discontinuance Order (LPDO) dates. Intel will discontinue builds on the LPDO date. After the LPDO date existing inventory is still orderable, under NCNR terms, and will be filled on a first come first served basis. Deliveries must be accepted within 90 days from the LPDO date.

Final purchase orders are non-cancelable and non-returnable, notwithstanding any conflicting terms in our quotes, purchase order acknowledgement or Distributor agreements.

Intel reserves the right to change the products because of material source restriction.

Customer Impact of Change and Recommended Action:

Determine your remaining demand for the products in the Product Affected / Intel Ordering Codes table and order and deploy prior to 01-March-2020 as the EU regulatory CE marking regulation will go into effect.

Determine your remaining demand for this product and/or evaluate additional sources (if applicable).

Lead-times on products with announced product discontinuance can typically stretch to 12 weeks and volumes are not buffered during the PDA period. Please work with your Intel representative on your quarterly demand forecast in order to reduce lead-times to 2-4 Weeks.

Please contact your local Intel Sales Office or Distributor if you require more information or need assistance in selecting a replacement product.

Milestone dates are estimates and subject to change based on business and operational conditions.
