## Description of Change to the Customer:

### Reason for Revision: Update the TA values for MM# 943790

Intel is replacing the TDA21310 Voltage Regulator Microcontroller (VRM) with PXM1310CDM and TDA21460 DIMM VRM on the Intel® Server Board S2600KPR and Intel® Server System HNS2600KPR due to the End of Life of the previous components. The new component is identical in form, fit and functions of the previous ones. Intel reports validation completed with passing results. Location of the replaced components is shown in Figure 1.

As a consequence of this change, the TA and PBA numbers will roll-up in addition to the MM number change, as shown in "Products Affected" table below.

### Customer Impact of Change and Recommended Action:

Intel does not expect any other impact to customers from these changes but encourages customers to understand the change and determine the impact on their applications.

Additionally, the milestone dates have been changed to accommodate customers better. Please see the *Forecasted Key Milestones* table above with its accompanying verbiage\*\*. Customers should be ready to place future orders using the new Order Code (referred to as the Post MM#)
