Product Change Notification

Change Notification #: PCN114390-00
Change Title: Packaging Materials Reuse, Informational Only, PCN114390-00, Transport Media, Reuse of Materials which ship in Trays

Date of Publication: March 31, 2016

Key Characteristics of the Change:
Transport Media

Forecasted Key Milestones:
Date Customer Must be Ready to Receive Post-Conversion Material: March 30, 2016

Description of Change to the Customer:
As an environmental and efficiency measure, Intel will be extending its re-use of inner and outer shipping materials to all customers that receive product in tray format. This is in continuation of our re-use activities already in process today.

The process for ensuring the quality of shipped material has not changed and is not changing per this customer communication. This notification is solely for customer information only. Below are some examples of what customers may see.

Examples:

Inner boxes (shipped within outer boxes)

Photo shows new label covering an old one

Brown tape covering original brown tape. Box ‘as good as new’ with no dents or scratches
Outer boxes

White labels covering up original labels - no information visible from original label
New labels applied neatly on top of original labels

New clear tape applied over original clear tape

Photo of cardboard shim used in strapping trays together

No tears – impression from previous banding
Customer Impact of Change and Recommended Action:
Boxes that have previously been used once will be selected to be in an ‘as good as new’ condition. Selection criteria established will ensure the boxes are free of any dents or scratches and structurally sound. Old labels will be covered so that they cannot be confused with new labels and new tape will be applied over the old tape to seal the boxes. Implementing the reuse of material will make it more difficult to see the difference between new and re-used boxes.

Customers may want to notify their shipping and receiving departments of this change.
