Overview of Changes:

Intel is announcing the discontinuance of the Finisar* Active Optical Cables (AOC), power class 4, for use on Intel® Omni-Path Architecture (OPA). Finisar SKUs are listed in the products affected table below.

The Finisar cable SKUs are being discontinued with a recommended transition to low power, class 2, AOC cables from two alternate suppliers. This action resulted from a change by Finisar of an AOC sub-component that was not approved for use on OPA. Existing inventory is unaffected by the Finisar change. The recommended low power replacements are fully qualified for use on OPA Fabric interconnects using FW 10.5 and above.

Existing inventory is limited and will be unavailable for additional orders after the "Last Product Discontinuance Order Date" (see "Key Milestones" above) OR as soon as current inventories are depleted.

All orders will be filled on a first-come, first-served basis. Intel Corporation will provide recommended low power, class 2, cables to fulfill orders as the Finisar inventory of specific lengths are depleted.

Customer Impact of Change and Recommended Action:

Orders are Non-Cancelable and Non-Returnable after Oct. 31, 2017.

Current Finisar cables will function correctly. No action is required by customers.

Please contact your local Intel Field Sales Representative if you have any questions about this change.

Milestone dates are estimates and subject to change based on business and operational conditions.
