## Description of Change to the Customer:

Market demand for the Intel® Celeron® M Processors 350J (1.30GHz) and Intel® Celeron® M processors Ultra Low Voltage 373 (1.0 GHz) on Intel Architecture based PC Applications has shifted to higher performance Intel® processors. The products identified in this notification will be discontinued and unavailable for additional orders after the "Last Product Discontinuance Order Date" (see "Key Milestones" above).

Intel® Celeron® M processors Ultra Low Voltage 373 (1.0 GHz) in tray media will continue to be supported for **Embedded and/or Consumer Electronics Applications**.

Please Note: The products listed in this PCN are Post-Conversion products listed in PCN104946-01. While they will follow the conversion timeline for products listed in PCN104946-01, these skus will maintain the EOL dates for the 350J processor (PCN105032-00). In order to coincide with messaging on corresponding chipsets (PCN105020-01), the notice of the CPU EOL (PCN105032-00) is being published now. Please note that this information is being provided early and does not indicate a pull-in of the key dates originally communicated in the EOL Guidance.

### Customer Impact of Change and Recommended Action:

Please determine your remaining demand for these products and place your "Last Product Discontinuance Orders" in accordance with the "Key Milestones" listed above. The tray products listed on the "Products Affected/Intel Ordering Codes" table below will remain on Intel's Corporate Commit Process until the "Last Product Discontinuance Order Date." The "Last Corporate Commit Hot List" is the last date that customers may submit a request for product utilizing Intel's Corporate Commit Hot List Process (CCP). From date of PCN publication, interim booking and turnback deadlines apply per standard CCP process. The "Last Product Discontinuance Order Date" is the final day for customers to book the commits Intel has granted after the "Last Corporate Product Hot List Date."

Boxed processors will not be available after boxed inventory is depleted (see "Key Milestones" above.) Intel is offering tray processors to Intel Authorized Distributors as a substitute for depleted boxed processor inventory. Substitute tray processors are identified below in the "Boxed Processors Product Table."
