

Product Change Notification

108730 - 01

Information in this document is provided in connection with Intel products. No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted by this document. Except as provided in Intel's Terms and Conditions of Sale for such products, Intel assumes no liability whatsoever, and Intel disclaims any express or implied warranty, relating to sale and/or use of Intel products including liability or warranties relating to fitness for a particular purpose, merchantability, or infringement of any patent, copyright or other intellectual property right. Intel products are not intended for use in medical, life saving, or life sustaining applications. Intel may make changes to specifications and product descriptions at any time, without notice.

Should you have any issues with the timeline or content of this change, please contact the Intel Representative(s) for your geographic location listed below. No response from customers will be deemed as acceptance of the change and the change will be implemented pursuant to the key milestones set forth in this attached PCN.

Product Change Notification

Change Notification #: 108730 - 01
Change Title: DP35DP, PCN 108730-01, Product Design, Component changes, Reason for Revision: AA numbers had wrong dash.
Date of Publication: August 25, 2008

Key Characteristics of the Change:
Product Design

Forecasted Key Milestones:

| | |
|---|--------------|
| Date Customer Must be Ready to Receive Post-Conversion Material: | Sep 11, 2008 |
|---|--------------|

Description of Change to the Customer:

Reason for Revision: AA numbers had wrong dash.

To enhance operation of the LAN the following component changes will be incorporated.

A 10.0 uF capacitor will be added to location C8LN.

A 2200.0 pF capacitor will be added to location M239BV.

A 0.10 uF capacitor will be added to location C20LN.

A 4.7 uF capacitor will be added to location C18LN.

The resistors at locations R20TH and R27TH will be changed from 0.0 ohm to 220.0 ohm.

Customer Impact of Change and Recommended Action:

This change has been thoroughly evaluated to ensure that there are no quality, reliability or functional implications to our customers. Intel is not recommending additional qualification of this change on platforms received from Intel.
