Effective August 31, 2010, Intel will no longer obtain or sustain the China CCC certifications on Intel's server sub-assembly chassis products. These products do not fall into the scope or catalogue of products requiring China CCC certifications; as these products are considered not fully integrated and are completely non-operational (e.g. no peripheral drives, memory, processors, add-in cards, etc). Please contact your local Intel representative if you have any questions regarding this notice.

This WEEE mark change is for the German scope interpretation of WEEE. WEEE is the European Union (EU) Directive regarding waste management of electrical and electronic equipment.

Please refer the following link for more information about Intel's WEEE Directive Recycling Program:
