Firmware Update  
**Reason for Revision: Firmware  
update**

**Date of Publication:** March 20, 2015

## Key Characteristics of the Change:

Product Design

## Forecasted Key Milestones:

<b>Date Customer Must be Ready to Receive Post-Conversion Material:</b>	Apr 6, 2015
---	-------------

## Description of Change to the Customer:

**Reason for Revision: Firmware update**

Intel is upgrading the firmware version on the Intel® SSD DC P3700 and DC P3600 series from [8DV10110](#) to [8DV10131](#). This firmware upgrade includes a bootloader upgrade from version [8B1B0129](#) to [8B1B012E](#), which can be updated as separate binary using the same firmware update process. These changes add features, improve performance, and enhance the product compatibility and reliability. Please contact your Intel representative for details. The new firmware cannot be downgraded to previous version(s).

Intel is releasing a new NVM Express™ (NVMe™) driver version 1.1.0.1004 for Windows\* operating systems, which will be available for download through the Intel.com support center.

The Intel® Solid-State Drive Data Center Tool will include the new firmware and bootloader in the release after February 9, 2015. Please see the release notes and user's guide for upgrade instructions.

### **Customer Impact of Change and Recommended Action:**

This firmware and bootloader update includes multiple improvements and new features over previous versions. Intel does recommend in field upgrades of the firmware and bootloader using the Intel® Solid-State Drive Data Center Tool. Intel will begin shipping product with firmware 8DV10131 and bootloader 8B1B012E after March 9, 2015.

Intel will attempt to deplete pre-conversion material before shipping post-conversion material but there is a possibility of Intel shipping mixed inventory. Therefore, customers will need to manage and migrate to the post-conversion material as soon as possible.

Milestone dates are estimates and subject to change based on business and operational conditions.
